People's Friendship University of Russia

President

Vladimir Filippov

Dear Mr. Vladimir Filippov,

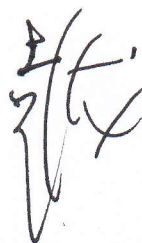

On the 55th anniversary of the founding of the People's Friendship University of Russia, I would like to congratulate and express our sincere gratitude to your distinguished university.

Founded in 1961, People's Friendship University of Russia has developed into a leading scientific and educational center, whose graduates have made a significant contribution to the development both home and abroad. The university has a world-renowned reputation in both academics and scientific research, and is leading the educational development of Russia. I am really delighted about your achievements.

Beijing Foreign Studies University and People's Friendship University of Russia have enjoyed the blessing of a long history of friendship. During past years of communication and cooperation, huge progress has been made in the exchanges of students and teaching staff as well as scientific research. And I hope that our future collaboration could be more splendid and fruitful.

The international scientific conference "International University – strategy and development tactics" is of great significance to improving internationalization, global education and cultural communication, and is well received worldwide. We are very interested in and highly value this conference. However, I am afraid that I would not be available during 5-7 February 2015 this time due to the schedule arranged. I hope that I could have the opportunity to visit your university next time.

Congratulate again on the 55th anniversary and thank you for your kind invitation.

Peng Long

President

Beijing Foreign Studies University
